Education

University of California, Irvine — Bachelor of Science, Informatics: Human Computer Interaction
Irvine, CA
Relevant Coursework: Human Computer Interaction, Software System Design, Requirements Analysis and Engineering, Software Testing, Analysis, and Quality Assurance

Irvine Valley College — Transfer studies: Informatics Focus
Irvine, CA
GPA 3.89. Transfer Preparation
- Participated in the Honors Program
- Vice President of Mandarin Student Association (MSA), organizing cultural events and strengthening students' bond

Experience

ROID INC. – Startup, Internship UI/UX Designer
Remote | April 2025 - Present
- Designed and implemented UI for a mobile fitness app that integrates AI-driven workout and diet recommendations
- Learned and coded in Swift using Xcode for iOS app development
- Researched and designed the user flow for the Shop feature, including Stripe-integrated payment system and program purchases
- Created the Explore page and mini-views to support personalized fitness tracking and daily health data visualization

Projects

ExpressHands: AI-Powered ASL Translation Interface
- Designed a mobile app interface that visualizes real-time American Sign Language (ASL) translation concepts
- Focused on accessible and intuitive UI/UX design using Figma
- Created user flow and visual mockups demonstrating how AI could interpret facial expressions and gestures to generate accurate emotional translations

Redesign: Discord Student Hub Enhancement
- Reimagined UI/UX element using Figma to improve accessibility for college students
- Designed based on insights from 5 distinct user personas
- Implemented design modifications to enhance usability for users with disabilities

Skills

Technical: programming languages(intermediate python, Java, C++, C, SQL, Swift for iOS)
Design: UI/UX Design, Figma, Accessibility Improvements
Languages: Mandarin (proficient), Korean (intermediate)
