Education

University of California, Irvine — *Bachelor of Science, Informatics: Human Computer Interaction*

Relevant Coursework: Human Computer Interaction, Software System Design, Requirements Analysis and Engineering, Software Testing, Analysis, and Quality Assurance

Irvine Valley College — *Transfer studies: Informatics Focus*

Irvine, CA

GPA 3.89. Transfer Preparation

- Participated in the Honors Program
- Vice President, Mandarin Student Association (MSA)- organizing cultural events to strengthen students' bond

Honors & Awards

2026 China-U.S. Young Maker Competition — 3rd Place, Grand Finale Shanghai, China

- Selected as a finalist team to compete on-site against teams from China and the U.S.; awarded full international travel sponsorship by the China's Ministry of Education
- Advanced through two rounds of project judging and live pitch defense, placing 3rd among 50+ teams

Skills

Technical: Swift, React Native, HTML, CSS, JavaScript, GitHub, Python, Java, C++, C, SQL, R, ggplot2

AI Certifications & Self-Training (In Progress): Azure AI & Power Platform Fundamentals (AI-900, AI-901, AI-102), Generative AI, LLMs & AI Integration Concepts

Microsoft Learn (In Progress): Azure AI Services & Foundry

Design: Accessible Design (WCAG), Figma, Canva, Wireframing, Prototyping, Data Visualization

Languages: Mandarin (proficient), Korean (intermediate)

Experience

ROID INC. – Startup, Internship UI/UX Designer, Irvine, CA April 2025 - December 2025

- Designed and implemented UI for a mobile fitness app that integrates AI-driven workout and diet recommendations
- Learned and coded in Swift using Xcode for iOS app development
- Researched the user flow for the Shop feature, including Stripe-integrated payment system and program purchases

Projects

NeuroScreen: AI Platform for Early Neurodevelopment Screening (Sponsored Project | Launching 2027)

- Designing a mobile screening platform that supports early identification of ADHD and autism risk in infants and toddlers using eye-tracking and physiological data
- Collaborating with cross-functional teammates and stakeholders to define product requirements, caregiver workflows, accessibility considerations, and clinician-facing experiences
- Creating user flows, wireframes, and prototypes for multilingual onboarding, caregiver guidance, child profile management, and intuitive screening result delivery

NextStep AI: AI-Powered Daily-Life Assistance App July 2026

- Placed 3rd out of 50+ teams at the 2026 China-U.S. Young Maker Competition Grand Finale in Shanghai with a multi-modal AI assistant that helps people with disabilities, older adults, and travelers abroad complete daily tasks independently through vision recognition, speech-to-text, and step-by-step guided navigation
- Contributed across product design, UX research, and prototyping, designing user flows and interactive prototypes that translated the app's "Eyes, Ears, Voice, Guide" framework into accessible UI patterns for blind/low-vision, deaf/hard-of-hearing, and non-speaking users
- Delivered the team's final pitch presentation solo to a judging panel competing against China and U.S. teams

ExpressHands: AI-Powered ASL Translation Interface March 2025

- Designed a mobile app interface for real-time American Sign Language (ASL) translation
- Focused on accessible and intuitive UI/UX design using Figma
- Created user flow and visual mockups showing how AI could interpret facial expressions and gestures to generate accurate emotional translations
